

Instrument Security Procedures

Model:

Fluke 525A & Fluke 525B

Product Name:

Temperature/Pressure Calibrator

Instrument Description:

The Temperature/Pressure Calibrator is an instrument that meets the demands of your process tools calibration workload.

Memory Description:

U21 ATMEGA128 microcontroller which has 128k of flash, 4k of EEPROM, and 4k of SRAM.

Memory Cleaning Instructions:

There is no user accessible memory. A programming device is required for accessing memory.
