

Keysight Technologies

ParBERT Automation

Data Sheet

PS-X10-100

- Simplify your manufacturing process by automating 812xx testing
- Reduce test setup effort, preparation time and test evaluation time

Service Description

Keysight Technologies, Inc. ParBERT Automation service provides assistance with the development and implementation of custom test software to automate 812xx system control. This software can be written in a variety of languages (Keysight VEE Pro, LabView, Visual Basic or C++) based upon your specific requirements.

Service Scope

A qualified Keysight technical consultant will develop the custom code to automate your 812xx control system. During an on-site visit, the consultant will integrate and test the software in your environment.

The time required to effectively deliver this service is dependant on the scope of the consulting engagement.

Business Need

- Improve time to market
- Improve quality
- Improve efficiency
- Increase productivity

What You Will Receive

- The services of a Keysight technical consultant experienced with automating instrument control in an 812xx environment
- A flexible service with specific deliverables defined in a Statement of Work - this may include:
 - A complete operational application program
 - Installation files
 - Program documentation
 - Written automation strategy

Required From Customer

- Test specifications
- Access to a ParBERT System
- Access to engineering resources with knowledge of your testing requirements
