Description

The Model CA-563 is a low-noise BNC to banana-plug cable assembly that is 9.5 in. (24.13 cm) long. This cable assembly is used to route test signals in the Model 8010 High Power Device Test Fixture and provides a guarded signal path to minimize leakage current.

Figure 1: Model CA-563

The Model CA-563 is specifically designed for use with only the Keithley Instruments Model 8010 test fixture.

Electrical characteristics

- Working voltage, hand-held: 30 V AC and 60 V DC maximum
- Working voltage, hands-free: 5000 V DC
- Current: 15 A DC maximum continuous
