# 4. SECTION 4: FIRST AID MEASURES

4.1	Description of first aid measures	
	Inhalation	IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. If breathing is laboured, oxygen should be
		administered by qualified personnel. If breathing has stopped, apply artificial respiration. Immediately call a POISON CENTER/doctor.
	Skin Contact	IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower. Contaminated clothing should be thoroughly cleaned. Immediately call a POISON CENTER/doctor.
	Eye Contact	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER/doctor. Treatment by an ophthalmologist due to possible caustic burn of the eyes may be required.
	Ingestion	IF SWALLOWED: Rinse mouth. Make victim drink plenty of water. Do not induce vomiting unless instructed to do so by medical personnel. Immediately call a POISON CENTER/doctor.
4.2	Most important symptoms and effects, both acute and delayed	Harmful if swallowed. Harmful in contact with skin. Fatal if inhaled. May cause an allergic skin reaction. May cause respiratory irritation. Due to irritant properties, swallowing may result in burns/ulceration of mouth, stomach and lower gastrointestinal tract with subsequent stricture. Aspiration of vomitus may cause lung injury.
4.3	Indication of any immediate medical attention and special treatment needed	Treat symptomatically. There is no specific antidote. IF SWALLOWED: Immediately call a POISON CENTER/doctor. Suggest endotracheal/esophageal control if lavage is done. IF INHALED: Immediately call a POISON CENTER/doctor. IF IN EYES: Obtain prompt consultation, preferably from an ophthalmologist. Chemical eye burns may require extended irrigation. Respiratory symptoms, including pulmonary edema, may be delayed. Persons receiving significant exposure should be observed 24-48 hours for signs of respiratory distress.

5.	SECTION 5: FIREFIGHTING MEASURES	
5.1	Extinguishing media Suitable Extinguishing media	As appropriate for surrounding fire. Extinguish with carbon dioxide, dry chemical, foam or waterspray. Alcohol resistant foams (ATC type) are preferred. General purpose synthetic foams (including AFFF) or protein foams may
5.2	Unsuitable extinguishing media Special hazards arising from the substance or mixture	function, but will be less effective. Do not use water jet. Direct water jet may spread the fire. May decompose in a fire giving off toxic fumes. Decomposes in a fire giving off toxic fumes: Nitrogen oxides, Aldehydes, Carbon monoxide and Carbon dioxide, Ammonia and volatile Amines.
5.3	Advice for fire-fighters	Fire fighters should wear complete protective clothing including self-contained breathing apparatus. Do not breathe fumes. Keep containers cool by spraying with water if exposed to fire. Avoid run off to waterways and sewers.
6.	SECTION 6: ACCIDENTAL RELEASE MEAS	URES
6.1	Personal precautions, protective equipment and emergency procedures	Ensure adequate ventilation. Keep upwind. Avoid breathing vapours. Avoid all contact. Stop leak if safe to do so. Wear suitable respiratory equipment. Use personal protective equipment as required. See Section: 8.
6.2	Environmental precautions	Avoid release to the environment. Floats on water. Do not allow to enter drains, sewers or watercourses. Spillages or uncontrolled discharges into watercourses must be alerted to the Environment Agency or other appropriate regulatory body.
6.3	Methods and material for containment and cleaning up	Ensure full personal protection (including respiratory protection) during removal of spillages. Contain spillages. Absorb spillage in earth or sand. Do NOT use absorbent materials such as: Cellulose, Sawdust or Ground corn cobs. Transfer to a container for disposal. Use waterspray to 'knock down' vapour. Ventilate the area and wash spill site after material pick-up is complete. Dispose of this material and its container as hazardous waste (2008/98/EEC).
6.4	Reference to other sections	See Section: 8, 13
7.	SECTION 7: HANDLING AND STORAGE	
7.1	Precautions for safe handling	Avoid all contact. Do not breathe vapour. Ensure adequate ventilation. Use personal protective equipment as required. See Section: 8. Do not eat, drink or smoke when using this product. Wash hands before breaks and after work. Take precautionary measures against static discharge. Protect from moisture. Do not apply pressure to empty containers.
7.2	Conditions for safe storage, including any incompatibilities	Store under inert gas (e.g nitrogen) to prevent ingress of moisture or air into the container. If a container is part emptied flush thoroughly with inert gas prior to resealing. Keep container tightly closed and dry. Keep only in original container. Keep away from heat, sources of ignition and direct sunlight.
	Storage temperature	Ambient.
	Storage life Incompatible materials	Bulk storage should be under nitrogen blanket. Keep away from: nitrosating agents, Strong oxidising agents, strong bases, Acids, Aldehydes, Alcohols, Copper (Brass, copper alloy and Bronze) and halogenated compounds. May react with: Aluminium and Zinc.
7.3	Specific end use(s)	Do not use sodium nitrite or other nitrosating agents in formulations containing this product. Suspected cancer-causing nitrosamines could be formed. Photostress® measurements.
